

TELL YOUR LEGISLATOR TO SUPPORT **THE COMMON** **AGENDA TO END GUN VIOLENCE**

The Common Agenda is powered by our partners. They are doctors treating bullet wounds and counseling patients at risk of suicide. Faith leaders who understand that valuing life is at the core of faith. Violence prevention advocates who are working tirelessly to stop the next shooting. And survivors, who have turned loss into power and purpose. Together, we're the Common Agenda to End Gun Violence.

The coalition currently is focused on three policy priorities, addressing common sources of gun violence and proposing common-sense, effective solutions:

THE AGENDA

EXTREME RISK PROTECTION ORDERS

Suicide is the #1 source of gun deaths. While 80% of individuals exhibit warning signs, there is little family members can do. ERPOs are a civil court process for law enforcement or close family to temporarily remove someone's firearm before it's too late. In one analysis, every 10 firearms removed saved one life.

LOST OR STOLEN GUN REPORTING

Every day about 21 guns go missing everyday in Pennsylvania. Many of them end up as part of illegal firearm trafficking, driving homicides. By requiring gun owners to report missing firearms within 72 hours of discovering it gone, we can reduce illegal gun movement 46 percent.

UNIVERSAL BACKGROUND CHECKS

Pennsylvania's background check halted 27,000 sales to violent criminal record, a clear history of abuse, or serious dangers. But a gap allows these same individuals to buy a long gun such as military style assault rifle from an individual without background check. Every gun sale should require a background check, no matter the seller.
